DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-8, drawn to a process for preparing a surfactant-free suspension.

Group II, claims 9-12, drawn to an aqueous suspension prepared by the above method.

Group III, claim 13, drawn to a dirt and water-repellant coating comprising the above suspension.

Group IV, claims 14-17, drawn to a process for preparing a dirt and water-repellant coating by applying the suspension as prepared above.

Group V, claim 18, drawn to an article having a water-repellant coating.

Group VI, claims 19-23, drawn to a protective coating.

Group VII, claim 24, drawn to a spray comprising the suspension.

PCT:Lack of Unity

Posteriori

Lack of unity of invention may be may only become apparent "a posteriori," that is, after taking the prior art into consideration, in the case of independent claims to A + X and A + Y, unity of invention(i.e. species) is present a posteriori as A is common to both claims. The

inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature which is referred to Annex B of Appendix A1 of the MPEP(Administrative Instructions under the PCT, "Unity of Invention"). The express "special technical features" is defined as meaning those technical features that define a contribution which each of the inventions, considered as a whole, makes over the prior art."(Rule 13.2). Unity exists only when there is a technical relationship among the claimed inventions involving one or more of the same or corresponding claimed special technical features. In this case, the technical feature shared by each invention is the aqueous surfactant-free suspension.

The question of unity of invention has been reconsidered retroactively by the examiner in view of the search performed; a review of Spenleuhauer et al. (U.S. Pat. No. 5766635), makes clear that the inventions of the groups I-VII lack the same or corresponding special technical feature because the cited reference appears to demonstrate that the claimed technical feature does not define a contribution which each of the inventions, considered as a whole, makes over the prior art. This is because Spenleuhauer et al. teach the technical feature of a surfactant-free colloidal suspension of nanoparticles in acetone and water (Example 2). Accordingly, the prior art of the record supports restriction of the claimed subject matter in to the groups as mentioned immediately above.

Conclusion

No claim is allowed.

All pending claims are subject to restriction/election requirement.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to ROBERT S. WALTERS JR whose telephone number is

(571)270-5351. The examiner can normally be reached on Monday-Thursday, 6:30am to

5:00pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Vickie Kim can be reached on (571)272-0579. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
